**Re: State Operating Permit for Mirant Potomac River Generating Station**

Dear Honorable Air Board:

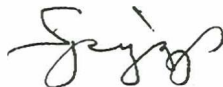

I am writing to you as a Virginia resident and Mirant employee urging you to adopt the Virginia Department of Environmental Quality's (DEQ) Consent Order presented on Tuesday, April 10<sup>th</sup>. I also urge you to authorize a stack merge, which is a legal and viable solution to downwash at the Potomac River Generating Station (PRGS).

The DEQ's April 10<sup>th</sup> proposal includes stringent environmental standards that protect public health and enable the PRGS to produce reliable electricity for the D.C. region, which, as you know, is energy constrained.

Absent your support of the DEQ's proposal, the PRGS may not be able to viably operate and my job could be in jeopardy. Additionally, the D.C. region could lose a major source of reliable energy which would threaten national security, jeopardize consumer pricing, further stress low energy supply, and present environmental problems related to water supply and waste management.

For me, my family, the community, and those who support reasonable fact-based solutions, I urge you to strongly consider and adopt the DEQ's recent proposal. As a Virginia resident and Mirant employee, I do not want to see our community and government face unnecessary problems as a result of short-sighted decisions.

Thank you,

A handwritten signature in black ink, appearing to read "G. J. [unclear]", is written over a horizontal line.
